

Dear Marija,

I hope this mail finds you well.

Now I am well back home again after a wonderful and inspiring week in Dubrovnik.

It was really nice talking to you, and I want to thank you and your colleges for the inspiring summer school. It was marked with an

open-minded and pragmatic attitude towards understanding and working with persons suffering from psychosis, which I believe opens the best opportunities for individualized treatment. Pragmatic, phase-specific and individualized treatment and a recovery perspective is also the basis of the SEPREP foundation educational programme in psychotherapy for psychosis that I am in charge of here in Norway. Check our website [www.seprep.no](http://www.seprep.no) (Unfortunately mainly in Norwegian). SEPREP is closely associated with ISPS and ISPS Norway, where I am also a member.

I wish you great success with your future programs and hope to see you again sometime in the future.

Best regards,

Leif Jonny J
